

LEUCO

INNOVATIONS

NOW INTRODUCING.....

Our New Multi Rip Saw Blades researched and stress tested will give you the required precise ripping cuts in solid woods and panel material.

Be it for cutting dry and planed woods or; for cutting naturally moist solid woods or; for precise ripping cuts in solid woods and panel materials.

We have the right type for your cutting and machine requirements.

They are perfect on molding machines or gang-rip saws with one or 2 shafts, or; on molding and splitting machines.

The Tungsten Carbide RAKERS prevent the sides of the wood from making contact with the steel plate.

They are sharp, clean, efficient and durable with a longer edge life.

We have readily in our stock:-

1. 250x3.2x70 Z=24+2 rakers
2. 300x3.2x70 Z=24+4 rakers
3. 300x3.2x70 Z=28+4 rakers
4. 350x3.2x60 Z=24+4 rakers

The Toplevel Solid 300x3.2x70 Z=24+4 "Type B" keyway saw blade

The Toplevel Solid 2500x3.2x70 Z=24+2 "Type A" keyway saw blade

Staggering the types of keyway (A-C-A etc.) on the shaft creates a cut division that puts less pressure on the machine.

Dear Valued Customers,

We at **LEUCO** Malaysia never stop thinking about how we can help our customers to achieve the highest level of **QUALITY and PRODUCTIVITY** that we have come up with these new **Multi-Rip Saw Blades** to cater for your needs.

Your valuable feedback, ideas and recommendations have given birth to these new breed of **Multi-Rip Saw Blades**.

And for this very reason you should try the **FRUIT OF YOUR IDEAS**. The tools that **YOU**, the people **who know better**, have helped us to **design**.

We Guarantee Satisfaction.

We have readily available stock. **Give us a call and we will make a price quotation to you immediately.**
